

Graduate Student Opportunity

PROTEIN BIOCHEMISTRY AND GENE EXPRESSION
For applicants with an active interest in metabolism, protein chemistry and/or molecular gene analysis. A B.Sc. in Chemistry or Biochemistry is required.

Positions are available in September for studies of enzymology, signal transduction and gene expression in natural animal models (e.g. freezing survival, hibernation) with applications to medical organ preservation. Techniques used include protein purification, enzyme structural & kinetic analysis, and molecular genetics (cDNA arrays, RT-PCR).
